

Empowering Young Minds

Maui Electric Company's school education programs are rooted in the belief that our children are our future. Empowering our youth with knowledge is key to their success.

Maui Electric's programs are tailored to fit the ages and needs of the school. Insuring the safety of the public, especially our keiki, is our primary concern. Elementary school (Pre-K through 5th grade) presentations focus on indoor and outdoor safety scenarios delivered through a live electrical demonstration.

Other key messages include a strong focus on our environment. These lessons include energy conservation, energy efficiency and sources of renewable energy like solar and wind.

In an effort to include as many keiki as possible, it is our goal to educate all grade levels during a single school visit. This would require set up in a library or cafeteria where classes could easily flow through in groups no larger than 40 to insure visibility and interaction.

To arrange a visit for your school, contact Lynndee Gomes at 871-2339. On Molokai and Lanai, dial toll free 1-877-871-8461, extension 2339.
